ReDrive-e

Battery powered roll pusher

Push forward with

# ReDrive

reliable and safe roll moving

✓ **20 tons**  
Max thrust force on flat

✓ **5 tons**  
Max thrust force on lift

✓ **14 m/min**  
Max speed

✓ **Stand-by function**  
for battery saving

✓ **Easy handling**  
and movement fluidity

Battery	48 V
ReDrive charger supply	110V - 220V
Weight	36 kg - 79 lb
Ø roll max	2300 mm - 90,5 in
Handle types	straight - rotating - tilting
Weight - complete ReDrive	32 kg
ReDrive station	5 kg

	<b>RDV.40</b>	<b>RDV.80</b>
Thrust force	14 tons	20 tons
Lift force	3,5 tons	5 tons
Max speed - m/min	14	11
ft/min	46	36

ReDrive is the eco-friendly battery powered roll pusher which makes moving heavy rolls easy.

It is equipped with a high performance plug & play 48V lithium battery which ensures long-lasting use between charges, thanks also to the stand-by function for battery saving.

Two XL rear wheels improve maneuverability and fluidity of movement. Dimensions and weight of ReDrive are optimized for ergonomic usability and exceptional performance.

A five segment LED on the top clearly indicates the battery status at all times.

Several models are available depending on the required thrust force and handle configuration.

ReDrive is also supplied with a durable battery charging station.
